

## ADDRESSING SUBSTANCE USE DURING PREGNANCY: LEGAL AND CLINICAL IMPLICATIONS

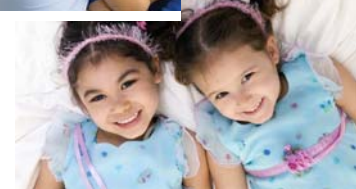

September 16, 2010

Wisconsin Indianhead Technical College  
600 North 21<sup>st</sup> Street, Superior WI

Wisconsin leads the nation on a number of alcohol risk factors including alcohol use during pregnancy. Prenatal alcohol exposure is a leading cause of disability, and can result in fetal alcohol syndrome (FAS) and related conditions. Incomplete and inaccurate information can create a barrier to providing effective services to women and children at risk. Please join us in this forum as we address the application of the Wisconsin Children's Code to prenatal alcohol exposure, and how this affects services to women and children at risk.

### AGENDA

8:30 am	Registration and Continental Breakfast
9:00	Interpreting and Applying the Wisconsin Children's Code: Addressing Drug use during Pregnancy
